

REMARKS

The restriction and species election requirements of June 15, 2004, have been received and reviewed.

Claims 1-43 are currently pending and under consideration in the above-referenced application, each being subject to both restriction and species election requirements.

Restriction Requirement

In the restriction requirement, the Office has restricted claims 1-43 as follows:

Group I – Claims 1-23, drawn to a method, classified in Class 451,
Subclass 41; and

Group II – Claims 24-43, drawn to an apparatus, classified in Class
125, Subclass 13.01.

An election is hereby made, without traverse, to prosecute claims 1-23 of Group I.

Election of Species Requirement

With respect to the species election requirement, the Office has identified the following species of invention:

Species 1: scribing, then severing the substrate;

Species 2: severing along the third street at a different time; and

Species 3: substantially severing the substrate without scribing.

An election is hereby made, without traverse, to prosecute the invention of Species 2.

It is respectfully submitted that each of claims 1-23 reads on the invention of Species 2. More specifically, the act of at least partially severing a semiconductor substrate along a third street at a different time than the semiconductor substrate is at least partially severed along a first street or a second street is within the scope of each of these claims.

It is also respectfully submitted that, in addition to reading on Species 1, each of claims 1-13, 15, 16, and 18-23 reads on Species 1, as scribing a semiconductor substrate along at least one street, then severing the substrate is within the scope of each of these claims.

In addition, it is submitted that each of claims 1-23 reads on Species 3, as none of these claims precludes substantially severing a semiconductor substrate along at least one street. In view of the foregoing, it is also respectfully submitted that each of claims 1-13, 15, 16, and 18-23 is generic to each of Species 1, 2, and 3.
